

wire and Tube 2024 with ecoMetals trails – sustainably successful

Time is running out – the climate transition makes a rethink imperative. Companies from the industries for wire, cable, tube and pipe are also now already to rely on utilising sustainable technologies in their production and in their products. Exhibitors at wire & Tube will show how exactly they are able to reconcile economy and ecology at the ecoMetals trails.

The Düsseldorf trade fair, as an initiative, will lead trade visitors to exhibitors during the exhibition period, thereby focusing on aspects such as resource conservation, energy saving, efficiency-enhancing innovations and the use of renewable energies. Efforts which are aimed at climate protection. Innovations and endeavours which also improve the competitiveness of companies. Successful on a sustainable tour!

Free participation for trade visitors

During the ecoMetals trails, trade visitors will be provided with the opportunity to find out first-hand about the strategies and innovations of the companies at their stands. For the first time, the wire & Tube offers digital trails – the tours can be scanned via QR code and walked through individually and free of charge.

Participating 12 exhibitors include: ArcelorMittal, Aurubis AG, Moreschi, Traxit Klüber Lubrication GmbH, Lebronze alloys SAS, Acciaierie Venete SpA, MKS elmarakbysteel cooperations, tenova LOI Thermprocess GmbH, La Farga YourCopperSolutions S.A, Condat Lubricants SAS, GMH Gruppe, Vulkan Verlag.
