

wire and Tube Mexico 2025: fully booked exhibition halls in Monterrey

Strong together in the Mexican market

Decision-makers from around the world will meet at CINTERMEX Centro Internacional de Negocios in Monterrey from 11 to 13 February 2025 to experience the latest technologies, trends and solutions from the wire, cable, tube and pipe industries. An extensive supporting programme with conferences, workshops and networking events will accompany the trade fairs, which will be presented together for the first time as a trade fair duo as part of the established Mexican trade fair Expo Manufactura.

Latin America, with its 19 countries, is considered an international growth market. Mexico, in particular, with its open, free-trade-oriented economic policy, plays a central role in the global supply chain as an industrial location. The North American country offers optimal conditions for expanding international trade relations.

This is where wire and Tube Mexico 2025 provide the ideal platform for strengthening existing business relationships and making new contacts. Over 140 international exhibitors will be demonstrating how innovatively, sustainably and digitally their industries produce on around 1,600 square metres. This means that the space for wire and Tube Mexico is fully booked.

The exhibition halls will focus on high-performance materials and technologies in wire and cable production, efficient solutions for tube processing, and automation, digitalisation and sustainability in manufacturing.

‘Take the opportunity to meet at decision-maker level, get valuable inspiration, network intensively and exchange knowledge,’ says Daniel

Ryfisch, Director wire, Tube & Flow Technologies at Messe Düsseldorf, looking forward to the start of the Mexican trade fair duo.

Country pavilions from Germany, Italy, Austria, France and Brazil as well as a group stand of the International Wire and Machinery Association (IWMA) reflect the global spectrum of the wire and tube industry. Here, companies from different nations present their solutions, technologies and services to promote international cooperation.
